MEMORANDUM FOR: See Distribution

SUBJECT : Engineering Systems Analysis Course

1. For the past year DD/S&T, through the Office of Training, has conducted an in-house seminar in Engineering Systems Analysis with emphasis on statistics, mathematical transforms, etc. A number of trial modifications have been initiated, both in form and technical substance, to attempt to design the course to the multidisciplinary needs of Agency technical components. It would be very useful for future reference to obtain feedback on the effectiveness of those modifications. This feedback is desired from Agency Technical Officers, as well as from those component Training Officers familiar with the course format or content. It is requested that the attached critiques be filled out by indicated addressees to the extent of their association with the course. General comments are particularly desired to indicate how effective the sequence has been in providing adequate statistical data analysis tools related to Agency engineering systems. The back of the questionnaire may be used for fuller details.

2. It is requested that the attached critiques be returned to this office by 2 April 1971.
